SUMMARY

Passionate programmer that recently completed the CodeforAll_ bootcamp. Gained hands-on experience in C#, Haskell, SQL, Java, OOP, JavaScript, full-stack development, and database management. Skilled in problem-solving, teamwork, adaptability, and critical thinking. Committed to continuous learning, with real-world projects showcasing software engineering and AI interests. Eager to apply technical and transferable skills to a dynamic tech role.

SKILLS

Java	HTML	SpringMVC
JavaScript	CSS	RestAPI
C++	React	SCRUM/Agile Methodologies
SQL	Tailwind CSS	Testing
		Git

EDUCATION

January 2025 - May 2025

Full-Stack Programming Bootcamp, Code for All_

September 2021 - June 2026

Informatic Engineering, Universidade do Minho

EXPERIENCE

June 2025 - July 2025

Intern, *Cachapuz*

Contributed to the design and build of Centrix, our cloud-based data entry & storage platform, by writing and debugging client-side (ReactJSX) and server-side (Node/JavaScript ES6) scripts. Helped architect the MongoDB data model—defining Collections, Properties and Key-based indexes—to support flexible schemas and efficient queries across complex data objects. Assisted with system testing and deployment, validating ObjectId relationships and index performance to ensure data integrity and scalability.

Dezember 2016 - August 2024

Teacher, *Aprovado*

Delivered engaging academic content and provided individualized support, resulting in improved student performance. Coordinated transportation and supervised over 100 children, ensuring safety and punctuality. Focused on strong communication with parents to enhance student development and engagement. Managed tasks efficiently, optimizing workflow and contributing to a positive learning environment.

January 2013 - September 2016

Waiter, *Historial*

Provided excellent customer service, increasing customer satisfaction and repeat business. Efficiently managed and processed orders, reducing wait times and ensuring accuracy. Maintained a clean, organized workspace, improving operational efficiency and creating a welcoming environment.

PROJECTS

Chatserver ([Link](#))

Chat server in JAVA capable of supporting multiple people. Able to receive special commands for different features (/quit,/list...).

Galeria-Lelo ([Link](#))

Galeria Lelo is a full-featured web platform built to manage and display art gallery content. It features a responsive user interface and a robust backend that supports persistent data storage with dynamic CRUD operations.

Foxalypse ([Link](#))

Foxalypse is a game built in Java using Simple Graphics Library. You are able to shoot from plants and also upgrade their level depending on your score. You have to protect your chickens and kill as many foxes as you can.

LANGUAGES

English - Advanced (C1)

Portuguese - Native (C2)

[RFP-AI-Response](#) ([Link](#))

TLDR is capable of responding to RFP with AI generated responses. It gives companies the ability to give fast responses to multiple requests. It will adapt the tone of the response to the name of the person/company, to its role in the company and to the request itself.

[Portfolio](#) ([Link](#))

My personal portfolio that contains a brief about me, languages i worked with, and two featured projects.

Paint ([Link](#))

Paint-like application in Java using Simple Graphics. You are able to paint and erase the squares with a brush, save your painting, load it later on, and you can also start a new one.
